

ASSEMBLY INSTRUCTIONS

1. Carefully unpack and identify all parts referring to illustration for parts identification.
2. Turn the power to the installation point OFF.
3. Unravel the supply power and ground wires and pass them through the center holes of rods (E), rod (F), loop (G), and canopy (H).
4. Place the metal panel (C) on the socket assembly (A) and secure with screws (D). Repeat the process for remaining metal panel (B) as shown in the diagram, securing with screws (D).
5. Thread the bottom of rods (E) onto the socket assembly (A). Repeat the process for remaining rods (E) and (F) as shown in the diagram, until snug.
6. Thread the loop (G) onto the top of rod (F).
7. Install proper bulb (not provided) to each socket referring to the markings and / or labels on the fixture for maximum wattage.
8. Refer to the additional installation instructions included with the product for wiring and installation.
9. Restore power to the installation point and retain this sheet for future reference.
